Bring concise takeaways and supporting evidence.

GROVE'S CARE NOTES

Noteworthy takeaways

- The recent average improved, but the remaining concern observations still matter.
- Emerging strain is driven most by high burden and moderate instability. The largest recent decline was **28 points**.
- 37% of recent observations were in the concern range (3% above baseline).**
- Recent wellness averaged **66 points, 5% above baseline**. This suggests recorded well-being was **improving** overall.

GROVE SCORE

49 points

Combines recorded wellness with burden, persistence, recovery, and instability. Longitudinal factors are weighted by available data confidence.
